

"Just a little note to say how impressed I've been with both your record keeping and helpfulness. In the event of anyone asking me about glassware, Jaytec is a name that I won't hesitate to recommend — you have really made a good impression."

Ian Collier, Medical Physics Technician, NHS

"We required special flasks with graduated necks and Jaytec Glass Ltd seems to be the only one in the world that will make to order. I have contacted several North American companies and they will not make to order."

Don Froese, Materials Supervisor, Amsted Rail, Griffin, Canada

Specialists in calibrated scientific glassware

Jaytec Glass Limited

Volumetric and Laboratory Glass

Catalogue and Price List 2026

Categories we Supply:

- General Volumetric Glassware
- Pharmacy Measures (Government Stamped)
- Pasteur Pipettes
- Capillary Tubes
- Microscope Slides
- Industry Glassware
- Educational Glassware
- Oil Test Glassware
- Milk and Dairy Products
- Plastic Coated Glassware

Jaytec Glass Limited

Volumetric and Laboratory
Glassware Manufacturers

Jaytec House, Burgess Lane,
Ivyhouse Lane Industrial Estate,
Hastings, East Sussex TN35 4NR
United Kingdom

An ISO 9001 Approved Company

Welcome

Jaytec Glass can help your business with standard and custom glassware. Our customers particularly value our expertise in scientific glass blowing and volumetric glassware calibration.

Why use Jaytec Glass?

You can benefit from our unbeatable combination of products, services and skills.

- No minimum orders
- Short lead times and competitive prices because we control the whole production process in-house
- Friendly, knowledgeable team that understands your requirements
- Calibration of glassware — new and existing items to any international standard with certificates of accuracy

Plus, Jaytec glass offers a free *Lab Glassware Savings Review* — we visit your laboratory to identify any potential cost savings that could be made with standard and custom lab glass.

Please contact us today to find out how we can help your business.

Custom Glassware

Many clients reduce the time and costs of their processes by using custom laboratory glassware. See our web site for examples and case studies. We can manufacture any laboratory glass or other calibrated glassware product to your specification. It may be a slight variation on a standard item or a tailored custom glass solution for your business.

How to Order

Please use one of the following methods:

Telephone: +44 (0)1424 424181

Fax: +44 (0)1424 721224

Email: enquiries@jaytecglass.co.uk

Online Shop: www.jaytecglass.co.uk

About Us

Jaytec Glass has earned its reputation as a leading manufacturer and supplier of standard and custom scientific glassware. We have over 60 years experience in volumetric glassware calibration and scientific glass blowing. We are based in Hastings, East Sussex in the UK. We serve customers in the UK and across the world.

All of our customers benefit from prompt delivery, consistent quality and competitive prices with no minimum orders. This is because Jaytec Glass, unlike many other manufacturers, still maintains control of the whole production process. All key processes are carried out in-house; this includes graphic design, screen manufacture, glass blowing, calibration and etching. We also stock key components to improve turnaround time.

MEASURING CYLINDERS

Measuring cylinders are used for measuring volumes of mobile liquids. For viscous liquids or semi-solids a conical measure is easier to use. There are a variety of types and styles of measuring cylinder.

For basic measurement of liquids in qualitative work a Class B cylinder is sufficient. For more accurate measurement of liquid a Class A cylinder is appropriate. These are calibrated to half the tolerance of Class B cylinders and each has a unique serial number for traceability. A certificate of accuracy traceable to national standards can be provided if required. Class A cylinders are used in analytical labs, quantitative labs, and other controlled environments. They are not suitable for work which requires accuracy of less than 1%. For this a bulb pipette (0.2%) or a gravimetric method (0.0001%+) should be used.

Stoppered cylinders are used for making up solutions where it is important to homogenize the liquid by shaking. They are also useful for measuring volatile solvents where significant evaporation might occur if the liquid is exposed to air.

Class B Spout Cylinders

Manufactured in accordance with BS EN ISO 4788:2005 out of borosilicate.

BURETTES

Burettes are used for titrations: a known quantity of substrate is measured into a flask, and the titrant is added slowly from the burette until the end point is reached and the volume is recorded. An indicator is often used to make the end point visible. There are many different types of titration, but they are usually either acid-base or redox reactions.

Burettes, Class B One Way, Glass Key Stopcocks

Manufactured in accordance with BS EN ISO 385: 2005 out of borosilicate glass, with interchangeable glass key stopcocks, conforming to BS 1751.

SEPARATING FUNNELS

Separating Funnels are used to separate a mixture of immiscible liquids. The mixture is poured into the funnel and allowed to settle until the two phases are sitting one above the other. The stopper is removed and the lower phase is drawn off first through the stopcock.

Separating Funnels, Pear Shape, Type 2, Glass Key

Manufactured in accordance with BS ISO 4800: 1998 out of borosilicate glass, glass key

Product Code	Capacity ml	Stopper Size	Stopcock Bore in mm	Price Each
WJ.558	25	B19	2	£ 35.86

Bilbate High Quality Glass Disposables

Jaytec Glass Ltd has taken over the manufacture of all Bilbate products including Capillaries and Pasteur Pipettes. For more than three decades, the name Bilbate has been associated with high quality glass disposables. Bilbate's reputation is built on dedication to quality and Jaytec Glass Ltd maintains this status whilst upholding Jaytec Glass Ltd.'s high standards of consistent quality, expertise and reliability.

CAPILLARIES

Micro-Haematocrit Tubes

Manufactured in accordance with BS ISO 12772:1997 out of soda glass.
Supplied plain in packs of 1000.

Capillary Tube sold separately

Thin Layer Chromatography (TLC)

Spotting Capillaries

TLC is a simple and inexpensive technique that is often used to judge the purity of a synthesized compound or to indicate the extent of progress of a chemical reaction.

Carrying out a TLC analysis comprises a number of stages: preparing a spotting capillary; marking the TLC plate; spotting the TLC plate; developing the TLC plate; drying the plate; visualising the substance spots, and measuring the R_f values.

TLC

Manufactured out of soda glass. Drawn to a fine bore for accurate spotting on TLC plates for qualitative analysis.

Micro Capillary ESR Kit

Micro capillary ESR provides results which correlate perfectly with the standard ESR, however they show the following distinct advantages:

1. Ease of obtaining specimens: From children, or from adults with poor veins or with such conditions as eczema or severe burns of the flexures, the blood specimen is easier to obtain.
2. Time saving and convenient: It is quicker to set up a microtest than a standard ESR. The test is easily set up on a clinician's bench and the results are readily to hand without the patient having to attend the laboratory, which avoids the subsequent delays involved. For the General Practitioner, this is particularly important, as blood sent by post is unsuitable for ESR estimation.
3. Cost: The method costs a fraction of the standard ESR test.

Product Code		Pack Size	Price
ESR-M-100	Micro Capillary ESR Kit	1	£ 96.89
ESR-M-100T	Micro Capillary ESR	100	11.60
CAP-CS-10	Capillary Sealing Compound	10	51.41

Methodology

1. With the ESR capillary tube, take the citrate solution to the first mark by capillary attraction.
2. Offer the tube to the wound and take the blood/citrate mixture to the second mark.
3. Turn the tube round — run the blood/citrate mixture to the non-filling end.
4. When the blood/citrate mixture reaches the end of the tube, insert into the sealing compound.
5. One end of the tube is sealed — gently roll the tube between finger and thumb to complete the mix of blood/citrate.
6. Finally, set up the tube in the scaling rack and use as instructed.

Pasteur Pipettes

Offer the following benefits:

- Easy to use
- Accurate controlled dispensing
- No contamination of samples
- Visibility of material being dispensed — enabling elimination of air bubbles and debris

Short Form Pasteur Pipettes

Manufactured in accordance with BS 5732:1985 \ ISO 7712 out of soda glass.

Pack Qty 1000 (250 x 4)

Product Code	Description	A mm	B mm	C mm	D mm	E mm	Price per Pack
PP-150-S100	Standard Pipette	7.0	90	60	1.4-1.6	150	£ 53.20

DROPPING PIPETTES

Pipettes are manufactured from 4.5mm or 7.25mm diameter neutral glass, but can be made of borosilicate or soda glass if required. We can supply virtually any size and style of dropping pipette. The most common shapes are illustrated at right. For convenience there is also a table showing the recommended pipette lengths for the most commonly used bottle sizes and types.

Our standard range of bent ball pipettes on page 39 are manufactured in 7.25mm neutral glass. Bent ball pipettes are supplied either loose or assembled with teat and cap. They can also be supplied printed with calibration lines. Please contact us for details.

ISO 9001

All laboratory glassware that is manufactured by Jaytec Glass Limited., is under BS EN ISO 9001: 2015 conditions and is of the highest standard of quality obtainable anywhere, with particular attention being given to the high standard of accuracy expected whenever volumetric glassware products are being used.

To maintain a high standard of quality, all our Laboratory Glassware products are manufactured by trained craftsmen using modern methods of production to prevailing British Standard Specification where such standards are specified.

Markings

The markings on our glassware products are clearly definable, being produced using either acid-etch method of graduation or by using ceramic enamel permanently fused markings.

Units of Volume

The unit of volume that is used in the production and marking of volumetric glassware is based on and conforms to the SI System that is now adopted as the standard volumetric unit in the United Kingdom.

Types of Glass

This catalogue clearly identifies the type of glass used on each product, either SODA lime or BOROSILICATE glass tubing

Grade A Volumetrics

In certain instances where a high standard of accuracy is required for a particular reason, then volumetric glassware marked and conforming to CLASS A standard should be specified, these are clearly identified within the pages of this catalogue.

Certification

If required, and for an additional charge we can provide you with a Works Certificate of Accuracy which is traceable to the National Physical Laboratory. Please ask our Sales department about this facility.

Grade B Volumetrics

For normal or general Laboratory or classroom work where a high standard of accuracy is not required, then items of volumetric glassware marked as conforming to CLASS B standards of accuracy are sufficient for most needs, and are considered to be ideal for use in schools, colleges, universities, hospitals, industrial laboratories and for all kinds of general routine laboratory work.

The use of unapproved devices
The additional use of unapproved devices or of an appendage in any form with any of our laboratory glassware cannot be recommended, as the company will not be held responsible for any kind of mishap that results from the use of any such device.

Caution and Check

We advise that all items of laboratory glassware should be checked and examined prior to their use in order to ensure and satisfy without doubt that the item being used is fit for purpose and suitable for the application.

This warning applies particularly where items of different types of glass are used within a laboratory, as it is extremely dangerous for SODA glass items to be unknowingly used in a laboratory for heating chemicals of any kind.

For this reason we do specify in this catalogue wherever possible the particular type of glass that has been used in its manufacture. It must be assumed that whenever a particular glass has not been specified that this item has been fabricated using SODA glass.

Health & Safety

Unless otherwise stated, all Jaytec products when despatched from the factory are NOT sterile, and the user must act accordingly.

Distribution

The distribution of our laboratory glassware products to the user in the United Kingdom is made only through approved laboratory furnishers, and we reserve the right to alter or to adjust any prices or

materials without prior notice should circumstances be beyond our control make such an adjustment necessary.

Technical Assistance

We would be pleased to assist in an advisory capacity and in accord with our years of experience in the scientific glassware industry, in placing our knowledge at the disposal of technicians who may be in need of such assistance.

Additional Services

Acid Etching of Glassware

As a service for our customers we undertake the Acid-Etch method of graduating any item of volumetric scientific glassware that requires to be graduated to specific requirements, and will be pleased to advise and to be of assistance in providing this service.

Amberising of Glassware

We also offer an amberisation service for Borosilicate glass products.

Screenprint Marking of Glassware

We also undertake the silk-screen printing in either White/Black/Blue enamel of glassware to special requirements of any items that are not shown in our catalogue.

Non-Catalogue or Custom Glassware.

Apart from the many products shown in this catalogue we have over the years manufactured many other Laboratory and Scientific glassware products with special requirements for our customers. Please ask our Sales Department for further information on this service or for them to provide you with a quotation.

Any glassware that is sent to us for graduating work or any additional process to be carried out by us, will only be accepted at the customers own risk in the event of breakage.

Terms and Conditions of Sale

Please refer to our complete list of conditions of Sale at the end of this catalogue.

1. Contract Terms

1.1 Unless other terms and conditions are expressly accepted by the seller by means of a specific written amendment hereto signed by the Seller the contract will be on the terms and conditions set out below ("the Contract terms") to the exclusion of any terms and conditions (except those implied in favour of a seller which are not inconsistent with the Contract terms) whether or not the same are endorsed upon, delivered with or referred to in any purchase order or other document delivered or sent by the buyer to the Seller.

1.2 The Uniform Laws on International Sales Act 1967 shall not apply to the contract.

2. Quotations

Quotations are valid for 30 days unless otherwise specified on the quotation.

3. Delivery

3.1 The Seller will endeavour to deliver the goods to be supplied under the contract ("the Goods" which expression includes any of them or any part of them) within the time agreed and if no time is agreed within a reasonable time, but in no circumstances will the seller be liable for the loss or damage of any kind whatsoever caused directly or indirectly by any delay in the delivery of Goods.

3.2 The seller may make delivery by instalments.

3.3 Goods will be delivered ex the Sellers works and the contract price is calculated on that basis unless otherwise specified on the Sellers quotation. Where the Seller arranges delivery of goods, the Seller will be under no obligation to give the buyer notice as specified in Section 32(3) of the Sale of Goods Act 1979.

3.4 No claim for damage or shortages will be considered unless the Seller is advised in writing within 10 days of delivery of the Goods. In the absence of such advise the Buyer will be deemed to have accepted the Goods. No claim for non-delivery will be considered unless the Seller is advised in writing within 7 days of the date on the Sellers invoice. Any claim for damage or non-delivery shall also be notified to the carriers by the Buyer in the manner and within the appropriate time limit prescribed by the carriers' terms and conditions. In the event of failure by the Buyer to give the appropriate notices the Buyers claim will be deemed to have been waived and will absolutely barred.

3.5 All prices quoted exclude the cost of Carriage & Packing which will be charged at cost to the Buyer and will usually be shipped overnight via Carrier (UK mainland only) These figures are Subject to an annual review. If the Customer requests a "special delivery" these will be charged to the customer also at cost. Except where the Seller has agreed in writing not to Charge Carriage or Packing.

3.6 In the instance where customers arrange to pick up the Goods themselves the Seller reserves to right to levy a nominal charge to cover packaging.

4. Guarantee and exclusion clauses

4.1 Where the Seller is not the manufacturer of the Goods the Seller will endeavour to transfer to the Buyer the benefit of any warranty or guarantee given by the manufacturer.

4.2 Subject to clause 4.3 unless the Seller has notified the Buyer otherwise, whether in the Seller's catalogue or howsoever, the Seller will repair or at its option replace any Goods which are proved to the reasonable satisfaction of the Seller to be defective in material or workmanship (fair wear and tear excepted), provided such defects are notified to the Seller within 12 months of the date of despatch.

4.3 The Seller shall free of charge replace or at its option refund the price of any goods which are proved to the reasonable satisfaction of the Seller to be defective. Provided such defects are notified to the seller within 7 days of the date of despatch.

4.4 The obligations contained in clauses 4.2 & 4.3 will not apply where:-

4.4.1 the Goods have been altered in any way whatsoever or have been subject to misuse or unauthorised repair; or

4.4.2 the Goods have been improperly installed or connected (unless the Seller carried out such installation and connection) or

4.4.3 the Buyer has failed to observe any maintenance relating to the Goods; or

4.4.4 the Buyer has failed to notify the Seller of any defect or suspected defect within 14 days of the same coming to the knowledge of the Buyer; or

4.4.5 the Buyer is in breach of this or any other contract made with the Seller.

Any Goods replaced will belong to the Seller. Any repaired or replacement Goods will be guaranteed on these terms for the unexpired portion of the guarantee period

4.5 save such clauses 4.1 4.2 4.3 & 4.4 the Seller will be under no liability under the contract for any personal injury, death, loss or damage of any kind whatsoever (other than death or personal injury resulting from the Sellers negligence) whether consequential or otherwise including but not limited to the loss of profits and the Seller hereby excludes all conditions, warranties and stipulations express or implied, statutory, customary or otherwise which but for such exclusion would or might subsist in favour of the buyer except such exclusion will not apply to :-

4.5.1 Any implied condition that the Seller has or will have the right to sell the Goods when the property is to pass; or

4.5.2. When the buyer deals as a consumer (as defined in section 12 of the Unfair Contract Terms Act 1997), any implied term relating to the conformity of the Goods with their description or sample or as to their quality or fitness for particular purpose.

4.6. In no circumstances will the Seller or his employees, agents or sub-contractors be liable for any loss or damage of any kind whatsoever (other than death or personal injury resulting from the Seller negligence) whether consequential or otherwise caused directly or indirectly by any negligence or other tortious act or breach of statutory duty on the part of the Seller or on the part of any of his employees, agents or sub-contractors in connection with or arising out of the manufacture or supply of Goods or in connection with any statement given or made (or advice not given or made) by or on behalf of the Seller.

4.7. The buyer is responsible for ensuring that Goods returned to the Seller are free from biological and Chemical hazard or contamination. The Seller reserves the right to refuse to accept Goods which in its view present a hazard to its staff or which may infringe the Health and Safety etc. Act or which are without a signed Certificate that effective disinfection or decontamination has been carried out.

5. Property of Goods

5.1 The property (both legal and equitable in the Goods) shall not pass to the Buyer until the purchase price of the Goods have been paid in full, and payment to the Seller of any sum which is at the date of the contract or may thereafter become due or owing from the Buyer to the Seller.

5.2 Until property in the Goods has passed to the Buyer or until delivery of the Goods to a third party pursuant to the permission given below, the Buyer will hold the Goods in a fiduciary capacity, will not obliterate any identifying mark on the Goods or their packaging and will keep the Goods separate from any other goods.

5.3 Prior to the property of the Goods passing to the Buyer the Seller permits the Buyer to deliver the Goods to a third party pursuant to a bona fide and arms length agreement to re-sell the Goods and allows the Buyer to convert or incorporate the Goods into or mix the Goods with other goods but such liberty will cease upon the termination of the contract.

5.4 Where the Seller is unable to determine whether any goods are the Goods the Buyer shall be deemed to have sold all goods of the kind sold by the Seller to the Buyer in the order in which they were invoiced to the Buyer.

5.5 The Seller may at any time after payment for the Goods has become due take possession of the Goods (which for the avoidance of doubt will include the right to stop the Goods in transit) and remove them and the Buyer shall be deemed to have granted irrevocable authority to the Seller to enter upon the Buyer's premises or other premises where the Goods may be by its employees or agents to take possession of the Goods and (if necessary) to dismantle the Goods from any thing to which they are attached.

5.6 The Seller will have the right to maintain an action against the Buyer for the price of the Goods notwithstanding that property in the Goods has not passed.

5.6 Nothing in the contract will constitute the Buyer the agent or Seller in respect of any re-sale of the Goods by the Buyer so as to confer upon a third party rights against the Seller.

5.5 Notwithstanding any other Contract Term, risk in the Goods shall pass to the Buyer when the Goods are delivered to the Buyer or its agent.

6. Price

6.1 Subject to clause 6.2 the price shall be fixed as specified in the Sellers price list current at date of order except as otherwise in agreed writing.

6.2 The Seller reserves the right to amend the contract price of Goods to take account of any variations in currency exchange rates, transport taxes and duties or the or the imposition of any new taxes or duties occurring from whatever cause before delivery of the Goods.

6.3 Unless expressly stated otherwise all prices are exclusive of VAT which shall be charged at the rate and in the manner prescribed by law from time to time.

7. Payment Terms

7.1 For all credit accounts approved by the Seller in writing for Customers in the UK, are to be paid in full within 30 days from the date of invoice

7.2 Payment will be made in Pounds Sterling in England The Buyer will establish and maintain in favour of the Seller an irrevocable letter of credit in English confirmed by a UK clearing bank payable at sight upon presentation to the bank by the Seller's invoice. Such letter of credit shall cover the full price of the Goods (including applicable taxes). All bank charges and other expenses in relation to the letter of credit shall be paid by the Buyer. No order will be acted upon until receipt of a suitable letter of credit unless other payment terms have been agreed by the Seller.

7.3 Statutory interest at annual rate of 8% plus Bank of England base rate from time to time will accrue daily and be calculated on a daily basis on overdue accounts from 30 days after the invoice date until payment.

7.4 Notwithstanding any contract term allowing the Buyer credit payment shall become due and payable to the Seller immediately upon termination of the contract.

7.5 Where the buyer makes a default under the contract or any other contract with the Seller in payment on the due date of any sum due to the Seller, the Seller without liability may postpone any delivery or may cancel the contract or any other contract between the Seller and the Buyer but without prejudice to any right or remedy which the Seller may have against the Buyer in respect of such default.

7.6 The Seller will be entitled to payments for all instalments of Goods delivered to the Buyer .

8. Cancellation

8.1 The Buyer is not entitled to cancel, extend or delay the contract or part thereof.

8.2 If the Seller consents to the Buyer cancelling the contract or part of thereof and returning the Goods to the Buyer shall be liable to pay the Sellers then current handling charge. Returns are only accepted subject to clause 4.7.

8.3 In the Case of an order being cancelled after a part shipment of the Goods have been made, the Seller reserves the right to have these Goods returned to the Seller at the Buyers Cost (Subject to clause 4.7).

8.4 If the Seller is unable to (wherever temporally or permanently) to procure any services or goods necessary to enable it to supply the Goods or if the supply of the Goods is prevented or hindered by reason of any cause beyond the Seller's reasonable control including labour disputes involving the work force or any part thereof to the Seller, restraints or delays affecting shipping or carriers, currency restrictions and Act of God, the Seller may cancel or suspend performance of the contract by notice in writing to the Buyer so far as it relates to Goods not then supplied or work not then done and such cancellation or suspension shall not give rise to claims by the buyer provided that the Buyer shall remain liable to pay for the Goods delivered prior to the date of such cancellation or suspension.

9. Promotional material

No drawings, descriptive matter, weights, dimensions or shipping specifications issued by the Seller or the manufacturer of the Goods, nor the descriptions and illustrations contained in the Seller's or manufacture's catalogues, price lists or other promotional material will form part of the contract nor be regarded as a warranty or representation relating to the Goods

10. Termination

10.1 The contract will terminate immediately upon the happening of any one or more of the following , namely , that the Buyer has had a bankruptcy order made against him or has made an arrangement or composition with his creditors or (being a body corporate) has had convened a meeting of creditors (whether formal or informal) or has entered into liquidation (whether voluntary or compulsory) or has a receiver manager administrator or administrative receiver appointed of its undertaking or any part thereof or a resolution has been passed or a petition presented to any Court for the winding -up of the Buyer or for the granting of an administration order in respect of the Buyer or any proceedings have been commenced relating to the insolvency of the Buyer.

10.2 The contract will terminate immediately upon service of written notice of termination by the Seller on the Buyer if the Buyer has failed to observe or perform any of its obligations or duties under the contract.

11. Returned Goods.

If goods have been ordered then subsequently found by the customer to have been incorrectly ordered. The supplier will endeavour to assist the customer by accepting back, where possible items which are listed in their current Price List, however a charge of £30.00 per order will be levied to cover handling & administration. Items which are not in the current Price List are to be treated as "Special Items" and therefor have been manufactured specifically for that Customer and cannot be exchanged for credit.

12. Orders

All orders must be in writing. Verbal orders over the telephone will not be actioned until they are confirmed in writing by the Buyer.

13. English Law

The formation, interpretation and operation of the contract will be subject to English Law and the Buyer submits himself to the non-exclusive jurisdiction of the English Courts.
